

1

Welcome your client and complete a client consultation to establish your client's choice of nail tip and length. Don't forget to sanitise yourself and your client. Warm your nail art cane if necessary.

Prepare the nail bed and remove any pterygium. Then go on to cleanse the nail plate and side walls ready for the chosen tip application.

2

3

It is important to apply correctly fitting tips and to blend in using a suitable grit file. **IMAGE 1** Trim the nail tips to the preferred length using a couple of sharp directions. **IMAGE 2** and **IMAGE 3** For this particular design, try filing at an angle to add extra dimension to your 3D design. Cleanse the nail plate and side walls. If appropriate, prime the nail plate following your product instructions.

Firstly, paint a rich milk or dark chocolate brown base from your chosen acrylic product. **IMAGE 4** Then, using a gold glitter, paint some swirls to form the base design of the nail **IMAGE 5**

4

5

Pick up a very small bead of clear coloured acrylic product where you are going to place your slice of nail art cane. Whilst the coloured product is still wet, place your various different nail art cane slices into place using a birchwood stick **IMAGE 6** Continue until all of the nails are decorated.

Continue your extension application by using clear acrylic with your usual size beads to create your nail enhancement zone by zone. Enhance the design further by filling in around the tips and edges of the nails with more gold glitter swirls.

6

7

Refine your nail extension to remove any imperfections to achieve the chosen shape. Ensure parallel side walls have an aesthetic 'c' curve, thinning at the cuticle area and free edge. Looking down the barrels of the nails will reveal ten identical bevel shaped and thin enhancements. **IMAGE 7**

Use a buffer block to remove any further slight imperfections and then apply a shiner to create an acrylic glass-like surface.

Finally, apply cuticle oil and offer your client any appropriate after care advice.

Be creative and experiment as much as you can and enjoy using the many other beautiful MyTinyWorld Nails cane designs. Visit our website for more ideas.
